The project ‘Replication Data for: How are social groups linked to the vote? Social group perceptions and party choice’ includes five files:

‘social_groups_vote_codebook.pdf’ is the codebook for the data used in the analyses.

‘social_groups_vote_obs_data.dta’ is the cleaned observational data used in the analyses.

‘social_groups_vote_obs_data_do_file’ is the Stata do-file reproducing the observational results presented in the article.

‘social_groups_vote_expt_data.dta’ is the cleaned experimental data used in the analyses.

‘social_groups_vote_expt_data_do_file’ is the Stata do-file reproducing the experimental results presented in the article.
