1 Data Files

ky_demos.csv is the data file for the analysis that generates Table 1 and Figure 2, plus material for the appendix

ky_placebo.csv is the data file for the analysis that generates the appendix's figure about differences across party identifications

ky_county.csv is the data file for the analysis that generates Table 2, plus material for the appendix

fig2data.csv is output derived from repcode.tables.do (see below) that is used to generate Figure 2

figappdata.csv is output derived from repcode.tables.do (see below) that is used to generate the appendix's figure about differences across party identifications

2 Code

Both of these code files assume that the above data files are in the working directory.

repcode.tables.do is Stata code for analyzing ky_demos.csv, ky_placebo.csv, and ky_county.csv

repcode.figures.R is R code to generate the graphics based on the repcode.tables.do analyses

3 Log files

replication.log is the log of repcode.tables.do in Stata

replicationlog.txt is the log of repcode.figures.R in R
