ABSTRACT

The research paper entitled, "Study of correlation of educational adjustment of academically backward children and teachers' aptitude of rural Primary Schools in district Ludhiana" aimed to assess the relation between educational adjustment of the Primary School children and teachers' aptitude in teaching. The study was based on a sample 120 rural Primary School children in the age range of 7-11 years and their class teachers. The sample was randomly drawn from Government Primary Schools. Respondents were selected purposively from rural areas of Dehlon block, Ludhiana District. Results of the study indicated that educational adjustment is significantly correlated with teachers' aptitude in teaching in primary schools.
